Anton Bringner

PROFILE

My name is Anton.
During my first two years in software development, I've realized I've only scratched the surface of what development truly entails, this both humbles and excites me. My previous profession as an electrician gave me valuable experience in teamwork and meeting deadlines. I find it easy to communicate with people and thrive in social environments. During my internship at Informer Svenska AB, I collaborated with two others to develop a PERT chart. The project primarily involved React and TypeScript, with some C# on the backend. As a team member, I bring curiosity and a strong willingness to learn. I'm most familiar with frontend development but look forward to deepening my backend skills with the hope of becoming fullstack in the future.

SKILLS

Operating Systems: Windows, WSL (Linux)

Programming Languages: Java, JavaScript, HTML/CSS, TypeScript

Tools & Frameworks: JUnit, Visual Studio Code, IntelliJ, Docker, Jenkins, Bash, Git, Maven, Gradle, Vue, React, GitHub

Databases: SQL, MySQL, MongoDB, SQL Server, SQLite

Work Methods: Agile methods, Scrum, Kanban

EDUCATION

Java Enterprise Developer – Yrgo, Gothenburg 2023-2025 Vocational Diploma, 400 YH credits (2 years)

Electrical Program (Electrical Engineering) – Östrabo Yrkes, Uddevalla 2010-2013 High School Diploma, 2500 credits (3 years)

WORK EXPERIENCE

Industrial Electrician – Actemium, Stenungsund 2014-2023 Built cable routes, installed and connected power and signal cables.
Required accuracy and planning.
Responsibilities: Installer and lead installer on smaller projects.

Intern, Informer Svenska AB, Göteborg 2024-2024 Developed a pert-chart with 2 other interns
Length: 10 weeks

Intern, Informer Svenska AB, Göteborg 2025-2025 Continued developing the part-chart from the first internship period
Length: 17 weeks

LANGUAGES

Swedish – Native
English – Fluent

INTERESTS

All forms of media, especially gaming and film.
I also collect watches and maintain a small collection.
